fabian HFO
our 4-in-1 device
VYAIRE Medical manufactures and markets more than 27,000 unique products for the diagnosis, treatment and monitoring of respiratory conditions in every stage of life. We are a singular, focused company offering products in four areas: respiratory diagnostics, ventilation, airway management and operative care consumables. VYAIRE Medical develops, manufactures, and distributes high-tech ventilation and monitoring solutions for neonatal, pediatric and adult ICUs and intensive care transportation. When it comes to the most critical areas of respiratory care, we are the leading partner for hospitals in ICU, neonatology, pediatrics, jet ventilation, and difficult airway management.

Our aspiration is to develop innovative solutions that simplify the busy clinical routine for caregivers and increase patient safety. With over 30 years of experience and together with our global network of clinical experts, we are able to quickly translate new developments into real innovations – and keep challenging ourselves to improve and set new benchmarks.

Our products have an excellent reputation for precision, quality, and service in the industry. We strive every day to provide the best solutions for the most challenging groups of patients. We continue to explore where others stop.
EASE OF USE
The fabian HFO is designed to optimize clinicians’ and nurses’ work flow within a single device, reducing the time needed to manage ventilator controls, configurations or different devices, resulting in more time and focused care for the baby.

DEVELOPMENTAL CARE
Particularly silent, the fabian HFO, creates a low-stress and low-noise environment for the undisturbed handling, bonding and kangaroo care of the baby during its development.

COMPATIBILITY & INTERFACE
This flexible system is compatible with all conventional breathing circuits currently available on the market. In addition, the fabian HFO is equipped with several communication interfaces (Acutronic AcuLink, Philips VueLink and CapsuleTech) for compatibility to hospital data management systems.

MODULARITY
Future-oriented: in addition to the pre-integrated conventional and triggered ventilation modes, software and hardware modules that may be required in the future are easily integrated and can be configured according to your needs.

MOBILITY
Designed for mobility: thanks to its compact size, the fabian HFO allows for transport within the hospital from delivery room to NICU and easy access to the baby at all times at the bedside.

PATIENT SAFETY
The fabian HFO is designed to keep babies safe and protected whenever they are ventilated. This includes the reduced risk of volutrauma in HFO with VG, the reduced risk of contamination with the HFO pulse generated from the inspiratory side and reduced risks of user errors with a user-friendly interface.

MOBILITY
Designed for mobility: thanks to its compact size, the fabian HFO allows for transport within the hospital from delivery room to NICU and easy access to the baby at all times at the bedside.

COMPATIBILITY & INTERFACE
This flexible system is compatible with all conventional breathing circuits currently available on the market. In addition, the fabian HFO is equipped with several communication interfaces (Acutronic AcuLink, Philips VueLink and CapsuleTech) for compatibility to hospital data management systems.

fabian HFO
our 4-in-1 device
From the delivery room to the NICU: the fabian HFO offers the best-in-class ventilation modalities in a single device.
ONE-TOUCH PRINCIPLE

All operation procedures are carried out using a direct, time-saving and easy-to-understand one-touch principle.

GRAPHICS

See waveforms, numeric data, loops, ventilator status, and more. Clearly displayed and represented.

Ease of use

A clear, bright touch-screen TFT with intuitive commands reduces human error and puts the focus back on the baby.
Modularity

A true modular system with a variety of ventilation modes for the ventilator configuration you need – more can be added and enabled whenever desired.

**4-IN-1**

All these features and even more in just one device:

- All neonatal and pediatric conventional ventilation modes (Volume Guarantee included)
- Non-Invasive Ventilation modes (NIV)
- O₂ therapy with High Flow Nasal Cannula (HFNC) and unique High Frequency Oscillation (HFO) with Lung Recruitment Maneuver
- Volume Guarantee

**FUTURE-ORIENTED**

Neonatal and pediatric ventilation modes (IPPV, SIMV, PSV and SIMV+PSV) with independent adjustment of inspiratory and expiratory flow reduces the work of breathing and inadvertent PEEP

**NEW FEATURES & COOPERATIONS**

VENTILATION BEYOND LIMITS

nCPAP and DuaPAP modes, for nasal and mask ventilation, with automatic leak compensation, featuring two-level CPAP mode to improve CO₂ removal.

NEW FEATURES & COOPERATIONS

- Option for in-line eTCO₂ mainstream for pediatric and sidestream Microstream® for neonatal patients.
- Option for real-time SpO₂ monitoring with adjustable Perfusion Index (PI) alarm.
- PRICO - Predictive Intelligent Control of Oxygenation
- Option for F.O.T. (Forced Oscillation Technique) for the assessment of the true lung recruitment.

New lung function monitoring parameters and graphics for decision-maker. Loops both in conventional and HFO modes. Rapid Shallow Breathing Index (RSBI), C2/C (overdistension index), resistance, compliance, time constant, minute volume and many others, available at a glance in the configurable numeric blocks.
Developmental care

Premature babies are fragile. One of their special needs is quiet time for normal growth and development. The fabian HFO is equipped with an electromagnetic expiratory valve, highly precise electronic flow meters and a uniquely designed HFO module, making the fabian HFOs one of the most silent ventilators in the world today – without using silencers.

Patient safety

On the receiving end of our ventilators are the tiniest and most fragile patients imaginable. Keeping them safe and protected whenever they are ventilated is our first priority of all our thoughts.

- Integrated lock function to prevent inadvertent settings.
- Easy maintenance with few parts for disinfection and sterilization without any risk of infection inside the ventilator – even during HFO ventilation.
- No bacterial filters and therefore no risk of increased resistance during humidified ventilatory therapies.
- Optimal support with reduced Work Of Breathing (iWOB).
- Reduced error risk thanks to the self-training ACUTRONIC concept inside.
- Built-in backup battery pack for up to 2.5 hours of self-powered operation.
Designed for mobility

Medical technology should simplify the work flow of clinicians. Interfaces should be familiar and intuitive. They should be consistent across different workstations, thus reducing the potential for error. Data should be entered just once and be available across multiple platforms to support decision-making.

Ultimately, innovations in ventilator design and clinical information management can improve both patient safety and outcomes, while supporting maximum flexibility.

Compatibility & interface

SERVICE MODE
Service mode with advanced diagnostics via USB port, standard Ethernet connection.

COMMUNICATION INTERFACE
Digital interface with hospital information systems, download settings and monitoring data.

FLEXIBLE & SCALABLE
The system is flexible and can be used with all conventional breathing circuits currently available on the market.

COMPREHENSIVE DEVICE
Allowing easy access to the baby at all times. No disturbances at the bedside in NICU/PICU from device reshuffles.

LIGHTWEIGHT UNIT
Designed for safe, practical transportation with integrated electronic gas blender and built-in battery.
The new fabian family

The new fabian generation consists of three Gold Club members. Each one represents the benchmark in its class, either in non-invasive, conventional or sophisticated high frequency ventilation. They are configured for your specific needs and can be upgraded with further options.

Finding your device

Non-invasive, conventional or sophisticated high frequency ventilation. No matter which product you choose, you’re getting a device that features the latest technology and is ready to ventilate beyond limits.

fabian HFO
our 4-in-1 device

The latest edition of fabian HFO comes with the HFO fully integrated into the inspiratory port. No additional tubing for HFO needed. Furthermore, the fresh gas port allows for easier use of NO systems. The fresh gas port also functions as the nCPAP port, making it even easier to switch modalities.

fabian +nCPAP evolution
our 3-in-1 device

The fabian +nCPAP evolution is a therapy system encased in a small yet powerful device. Ideal for NICU, PICU and transport applications.

fabian Therapy evolution
our 2-in-1 device

The fabian Therapy evolution is the smallest but not the least powerful fabian family member. A true, complete and highly advanced non-invasive ventilator featuring all classic and new NIV modes.

Main Features

- O₂ Monitor (FiO₂)
- Electronic Gas Blender
- Inspiratory and Expiratory Flow (Bias)
- Leak Compensation
- Integrated Battery
- Color TFT Display
- Touch-screen Display
- Volume Trigger/Flow Trigger/Pressure Trigger
- Curves: Pressure, Volume, Flow
- Loops: F/P, P/V

Advanced Monitoring

- CO₂ Module (Sat or Main-stream)
- SpO₂ Module (Masimo)
- PRICO
- FOT

Ventilation Modes

- CPAP
- PRV-VAV
- SPRI (A/C)
- SPV
- SPV + PSV
- NIV (nCPAP, duoPAP)
- NIV Trigger
- HFO
- Volume Limit
- Volume Guarantee
- O₂ High Flow Therapy
- O₂ Flush
- Manual Breath

= standard  = optional
Technical specifications

**Functionality**

The fabian HFO is intended for premature infants, newborns as well as children weighting up to 30 kg.

**Intended Use**

The fabian HFO is intended for “in-patient use” in hospitals, medically-used rooms and intra-hospital patient transport.

**Ventilation modes**

- HFOV (optional) and HFOV (nasal HFOV)
- High Frequency Oscillation (piston + membrane principle)
- SIMV (A/C) and N-SIMV (nasal SIMV)
- Synchronized Intermittent Mandatory Ventilation
- SIMP (A/C) and N-SIMP
- Synchronized Intermittent Mandatory Pressure Ventilation
- CPAP and nasal-CPAP (dual limb circuits)
- Continuous Positive Airway Pressure
- PSV - Pressure Support Ventilation

**Ventilation modes (cont.)**

- SIMV + PSV
- Synchronized Intermittent Mandatory Ventilation combined with PSV
- Non-Invasive Ventilation (NIV) with single limb circuits (CPAP)-2/dualPAP with variable flow generators (i.e. infant flow LP)
- NIV Trigger - S-dualPAP (Synchronized dualPAP) and Apnea Detection
- HPNC (INFOTI - O₂ Therapy, option)
- PRICO (Predictive Intelligent Control of Oxygenation), option with Masimo® SpO₂ sensor technology

**Special procedures**

- Manual inspiration/hold (Sustained Lung Inflation)
- Lung recruitment/hold (Sustained Lung Inflation)
- CPAP and nasal-CPAP (dual limb circuits)
- Continuous Positive Airway Pressure
- PSV - Pressure Support Ventilation

**Designed in Switzerland**

The fabian HFO is the result of more than 30 years of experience in design, development and craftsmanship. Powerful components such as long-lasting battery packs, innovative modules like a one-piece expiratory valve and a cleverly reduced assembling concept with easily accessible parts make this device user-friendly.

Together with a customized service program, fabian helps to minimize the cost of ownership.

**Dimension**

<table>
<thead>
<tr>
<th>W x H x D</th>
<th>Weight approx. 20 kg with HFO module</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 cm x 37 cm x 40 cm</td>
<td>Diagonal screen size 10.4&quot;</td>
</tr>
</tbody>
</table>

**Input and output ports**

- 1 USB port (for SW updates/Log files)
- 1 RS 232 (9 pin) port for PDMS/HIS
- 1 RJ 45 Ethernet port for PDMS/HIS
- 1 CO₂ sensor connection
- 1 SpO₂ sensor connection
- 1 Video out connector (HDMI)
- 1 nurse call connector

**Enhancements**

- Apnea ventilation
- Backup ventilation
- Combined SIMV + PSV ventilation
- Flow trigger
- Volume trigger
- Pressure trigger
- Adjustable PSV termination criteria
- NIV with leak compensation
- NIV Trigger (Synchronized NIV)
- Volume Guarantee
- Volume Limit
- Demand flow in CPAP
