

Clinical Integration – Worklist

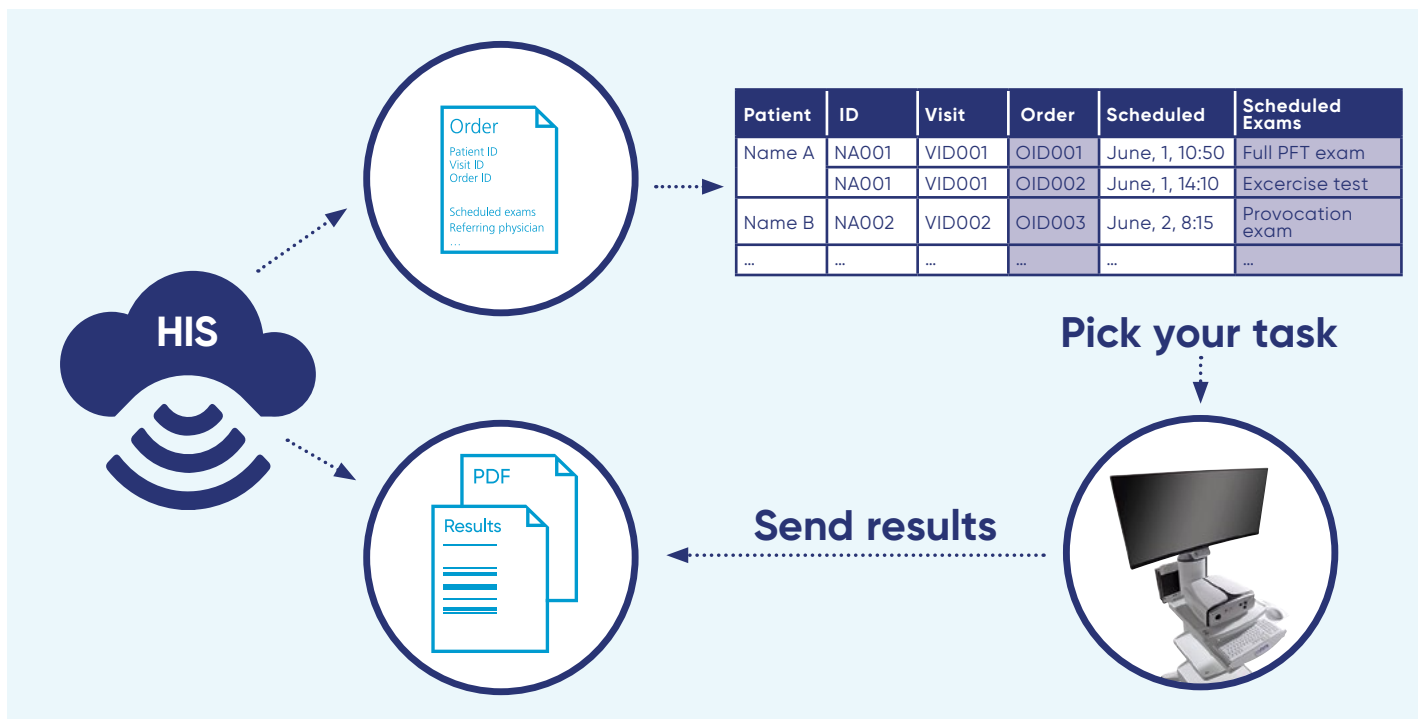

A diagnostic pulmonary function lab is a busy place. Efficiency is key for an optimal usage of systems and resources. An ideal task management generates time and enables your caregivers to focus on the patient, leading to outmost quality outcomes in diagnostics. SentrySuite® worklist provides both the organizational and technical interface to integrate your lab into your hospital environment.

Advantages

- The power of a single interoperability solution – easily schedule orders for all PFT and CPET units
- Synchronization of lab data with your master records is granted
- Customised workflows: create or update patient details and schedule exam visits to create bespoke workflows for you and your colleagues working day
- All in one – link useful information, such as visit and order ID's or the referring physician to a task

Define your individual solution:
