MicroGard® II
pulmonary function filter
MicroGard® II pulmonary function filter

Our filters provide an easy way to help ensure protection from cross-contamination. The MicroGard II stands for patient and operator safety without compromising on system performance and clinical output.

**Key Features**

- 99.999% viral and bacterial efficiency against cross contamination
- Low resistance to airflow
- Minimal dead space (55 mL)
- Filter housing and filter fleece tested for biocompatibility
- 2 filters and 2 filter kits configuration versions
- Validated for compliance with the complete Vyaire Respiratory Diagnostics product line
- Cleaning cycle for downstreamed parts can be reduced up to three months by using MicroGard filter*
The MicroGard II filter series

- **MicroGard IIB** with integrated oval shaped mouthpiece suitable for adult and pediatric use.
- **MicroGard IIC** with round shaped connector for use with special lung function mouthpieces, ideal for gas dilution and bodyplethysmographic measurements.

After extensive testing at independent labs such as Nelson Laboratory the MicroGard II bacterial/viral filter confirms to offer the right balance between optimized filtration efficiency and minimal resistance (Delta P) to airflow. Based on strict Vyaire verification and validation processes, the MicroGard II does not affect equipment measurement characteristics while protecting patient, operator and equipment from cross-contamination.

**Product specifications**

- Inspiratory resistance: < 0.04 kPa/(L/s) at 1 L/s (< 0.4 cmH₂O/(L/s) at 1 L/s)
- Expiratory resistance: < 0.04 kPa/(L/s) at 1 L/s (< 0.4 cmH₂O/(L/s) at 1 L/s)
- Filtering efficiency against cross contamination:
  - Bacterial > 99.999%
    (based on Nelson Test Report 10003754)
  - Viral > 99.999%
    (based on Nelson Test Report 10003754)
